STAR SET OF SIX EVERBLOOMING ROSES

COSTING \$1.55 FOR \$1.25. THE SET OF SIX IN 2-YEARS FOR \$2.75.

COLUMBIA (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a true pink shade, deepening as it opens to glowing pink. A peculiarity of this variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring. 25c.

KILLARNEY BRILLIANT (H. T.)—The introducers are to be congratulated 16 years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth, and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra. 25c.

MADISON—A splendid pure white Rose. 20c.

MADAME COLLETE MARTINET (H. T.)—A vigorous grower of coppery-orange color. The

color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one. 25c.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S. 35c.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red. 25c.

BOUQUET SET OF FIVE DAHLIAS COSTING \$1.25

FOR ONLY \$1.00.

See Opposite Page of Cover for these Dahlias Displayed

DELICE—Its beautiful soft yet lively color a glowing rose-pink, together with its shape, makes it one of the prettiest and most valuable of all Dahlias. 25 cents.

FLORADORA—Deep dark, rich wine-crimson, splendid shaped flowers on long, upright, wiry stems. 25 cents.

FRINGED CENTURY—Intense rosy-carmine with lighter edges, fringed or cleft petals; blooms all summer; fine for cutting. 25 cents.

QUEEN VICTORIA—Pure canary-yellow. One of the freest bloomers. Good for cutting. 25c.

SPRINGFIELD—A new Dahlia of our own introduction. It is identical with Countess of Lonsdale except in two essentials. It has a darker stem and the flowers, instead of being a salmon-pink as in Lonsdale, in Springfield are a rich amaranthine-red. Its beauty cannot be described. No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It lasts longer cut than any Dahlia we know. 25c.

***BERTREX, the Beautiful**—Lustrous white with pencil stripes of lilac in throat. Stands right at the top of all existing white varieties. Flowers of great substance and of the size and form of America. Increases rapidly, takes up water well and a good shipper. Our customers give their unqualified endorsement. Each 15c.

***ELECTRA**—Very large brilliant scarlet of a bright and pleasing brick-red with small light blotch, one of the earliest varieties. First-class certificate Haarlem and London. Each, 7c.

GLORY (Ruffled)—This is the first ruffled Gladiolus that Kunderd produced. The opening buds are of a soft creamy tint, edged with pink, but as the flowers expand the ground color changes to rich ivory-white suffused with pale lavender, which is deeper on the edges. The lower petals are buffish, with a pale crimson stripe through the center; the throat is penciled with buff and crimson. The spike is straight and strong. Flowers large and of graceful form; four to six out at one time. This is the variety that made Kunderd famous. Each, 10c.

***L'IMMACULEE**—Undoubtedly the best commercial white Glad in existence. Very tall spike well set with large flowers of great substance. Each, 10c.

LOVELINESS—As its name implies this variety produces flowers of distinction in daintiness

and beauty. The color is of pale creamy tone, soft and delicate, with a roseate tinge in the center. The flowers are large and well placed on the spike; and as a major part of these splendid blossoms are open at one time they make this variety superior for decorative effect. Each, 10c.

***MRS. FRANK PENDLETON**—The new sensational beauty, winner of awards and prizes everywhere. The petals show beautiful bright rose-pink on a pure white ground, contrasting in a most striking way with the deep rich velvety blood-red blotch on the lower petals. As showy as an orchid. The most perfect and delicate coloring is produced when the spikes are cut and carried indoors as soon as the first blossoms open. No grander variety in existence. Each, 10c.

***MRS. WATT**—Glowing American Beauty shade of wine-red; self color; well opened flower, nearly all flowers open at one time; spike very erect and not too stiff. Very distinct variety. Created a lot of comment at recent exhibitions. Each, 15c.

***PINK PERFECTION**—A true apple-blossom pink with immense flowers. The buds are so many and crowded so close together on the stalk that when it blooms is one mass of light delicate pink. The softness of coloring and the magnificent texture of blooms make it one of the choicest of the new varieties. Each, 15c.

WHAT OTHERS SAY

Good & Reese.

Duval, Ohio.

I want first to tell you that I had some of the finest Roses this fall I ever saw. Picked 300 from last of September to the freeze in early November, and the bushes were loaded then. I am certainly proud of the Roses that you selected for me. Sincerely, F. T.

The Good & Reese Co.

Ketcham, Okla.

Very late in the spring of the year 1918, I ordered from you quite a number of one-year-old size Roses. When they arrived I found them to be two-year-old size, and the finest plants I had ever received. I thank you, and assure you that they were appreciated. They were the wonder and admiration of everyone who saw them; they were true to name, and grew splendidly, some of them attaining the height of 45 inches, and were a wealth of bloom until the fifteenth day of December. One Kaiserin had nine large blooms at one time, the largest being 16 inches in circumference. Helen Good was another one that grew splendidly, and I found it to be a true Cochet. General McArthur is the most gorgeous red Rose I ever saw, and I am sure I had perfect specimens. Each and everyone that lived did well, and I lost very few. Under separate cover I am sending a small order, and I am recommending your house to everyone, and am sending names of some whom I know will be interested. Please send my order at once, as it is warm enough now to set them out, the wild flowers being in bloom. Very truly, W. S.

Gentlemen:—You know when my Roses came last year that I was somewhat disappointed in them, and I wrote you complaining about them. But say, I was wrong, as everyone of them came out with flying colors; every single one of them lived and bloomed abundantly, and they were the most beautiful Roses one could wish. I have seen Roses in the cut-flower stores, but not to surpass mine. I hope the order I am sending you will do as well. If they do you will have my everlasting thanks.

Yours truly,

H. M. S.

Gentlemen:—The Roses and plants arrived yesterday and I have just finished planting them out, and to say I am pleased, why, I am just real proud; that is stating the facts. I have never seen such fine Roses before and I have bought from a good many different greenhouses. The packing was so well done, I do not see how you can pack so securely that not even a leaf was bruised. I am anticipating a great deal of pleasure from my flowers this summer, and in the fall I will write and tell you how they bloomed for me. With heartfelt thanks. MRS. J. M.

Corsicana, Tex., Feb. 6, 1920.

The Good & Reese Co.

I had such fine success with the Roses that you sent me last year that my Rose garden was the talk of the town by my friends. I had Roses blooming almost all year. Now I want 50 more such Roses, little different in colors. G. A. P.

Beeville, Tex., Feb. 19, 1920.

The Good & Reese Co.

I have always claimed to my friends that G. & R. was the finest house in the U. S. for plants; my roses were wonderful. Four years ago I ordered Mums from you and I have made hundreds of dollars from the first three years' selling blossoms and plants. Always regard me as a customer. Respectfully, MRS. C. L. K.

Brownsville, Texas, Oct. 22, 1919.

The Good & Reese Co.

Gentlemen:—My success with my Roses has been phenomenal. I received a large shipment last spring from you, and to say that they have exceeded my most sanguine expectations is putting it mildly. I had abundance of blooms all summer, and now they are loaded with their precious burden. Golden Emblem is a beautiful Rose; no wonder it captured the gold medal. Mrs. Henry Winnett is the most gorgeous red Rose I have ever seen. Red Radiance—what cannot be said in praise of this wonderful Rose? It is a strong grower, the flower is of the largest size, and the coloring is matchless. It is a wonder. Rose Marie is another variety that will surely win a place for itself. Madame Collette Martinet, a glorious coppery-yellow with decided orange tones, is a superb yellow Rose. Molly Bligh is exceedingly pretty and delightfully fragrant. Another good Rose is Killarney Brilliant; it has a sheen about it seldom seen among Roses. Then what can be said about Los Angeles? It makes no difference what you say, you have not said enough when you describe it as equaling the finest Marechal Niel—that does not tell half about it. Simply bewildering is what my Rose garden shows with your glorious Roses. I shall be doubly pleased if the enclosed order bears anything like as fine results. I thank you again. From an appreciative customer. J. S.

Jackson, Miss.

By the way you will remember about three or four years ago I gave you a testimonial for the longevity of your Roses. I bought about 60 or 80 Roses from you in 1888, just 31 years ago. There were about a dozen living the past summer, when I had them dug up. You can see what your Roses have done for us.

Respectfully,

W. BAKER S.

Presque Isle, Mich., Aug. 6, 1918.

I planted from you in the fall of 1915 seventy-five Peonies. The next season there were 150 blossoms, the next season there were 300 blossoms, and the next season 1,200 blossoms. All lived, and they make a beautiful hedge, being the first of flowers to appear, and the hedge grows to the height of three feet and remains green until near winter. This hedge and blossoms was viewed and admired by hundreds of people. I live in Adrian, nearly direct across from the public library, and fifty feet from the city hall. I am very proud of these Peonies, and am sending you a photograph of them. Yours, S. E. G.

Morehead City, N. Car.

My Ferns, "Boston" and Baby's Breath," bought of you last fall are the most beautiful Ferns I have ever grown. I thank you for them. MRS. H. C. A.

The Good & Reese Co.

Zanesville, O., April 19, 1920.

In the collection sent me two years ago, Pharison Rose has proved to be the best Rose I ever saw, bearing 56 roses last year, without a single imperfect bud or bloom; can you beat it? I have 24 different kinds of Roses which are the envy of the neighborhood. G. L. S.

The Good & Reese Co.

Norfolk, Va., May 17, 1920.

The bushes I bought last fall are doing fine and are in bud. Los Angeles beats anything growing I ever saw. Mad. C. Testout is a wonderful Rose; it is full of buds and has been green all winter, never stopped putting out new leaves. Your customer, N. D.

THE CREAM OF THE NEW ROSES.

We here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Ireland, Italy, Holland and America can produce.

Price 25c. each, except where noted. Two-year plants, 60c., except where noted.

COLUMBIA (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a true pink shade, deepening as it opens to glowing pink. A peculiarity of this variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring.

COUNTESS CLANWILLIAM (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY (H. T.)—This is the Crimson Chatenay, a great Rose. All know the Mme. Abel Chatenay. Well, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

CRUSADER—(New.) A big, strong growing variety, robust and rugged in every characteristic. The growth is heavy and the flower stem strong and heavy. It is free flowering and the blooms are big and double and in color a rich velvety crimson. A free flowering red Rose that is a wonder. **50 cents.**

FLORENCE FORRESTER (H. T.)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star Spangled Banner," and also that it should hail from Baltimore, one of whose forts was being assailed when the inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red Rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

FRANK W. DUNLOP—(New.) Did you see it at the International Flower Show at New York the past spring? Its record at the exhibition, winning silver medal for the best new pink Rose, gold sweepstakes medal for the best seedling in the show. Frank W. Dunlap was the finest flower in the exhibition. Claimed to be better than Mrs. Charles Russell. **50 cents.**

GLADYS HOLLAND (H. T.)—Of magnificent form and size. Color, buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.

GLOIRE DES BELGES (H. T.)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form

Frank W. Dunlop.

with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN SPRAY (H. T.)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Niel yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.

HADLEY (H. T.)—In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HOOSIER BEAUTY (H. T.)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thoroughly established in the soil sends out long, stiff growths with a bud on every shoot."

THE CREAM OF THE NEW ROSES—Continued

HENRIETTE (H. T.)—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.

KILLARNEY BRILLIANT (H. T.)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

LADY PLYMOUTH (T.)—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England, and silver medal at Crystal Palace Show, London.

LADY ROBERTS (T.)—The color is a rich golden-yellow, very free bloomer and a grand garden Rose.

LOS ANGELES (H. T.)—Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever increasing wealth of color is maintained from the incipient bud until the last petal drops. 50c each; 2-year plants, \$1.00.

LILLIAN MOORE (H. T.)—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar Trophy offered by the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow, deeper center; long buds; free bloomer.

MADAME COLLETTE MARTINET (H. T.)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

Francis Scott Key. (See description on page 3.)

Lillian Moore.

MADAME BUTTERFLY—(New.) Is Hill's glorified sport of Ophelia. Seen and admired by thousands. All the color tones of Ophelia are intensified, making it a harmony of bright pink, apricot and gold. Ophelia ranks at the top in popularity and Madame Butterfly will surpass it. It averages more petals to the bloom; it produces more bloom to the plant because it makes more branches, everyone carrying a bud. The tight buds are a lovely shade of Indian oak, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color and of delicious fragrance. 50 cents.

MADAME MARCEL DELANNEY (H. T.)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Bagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S. 35c each.

THE CREAM OF THE NEW ROSES—Continued

New Rose, Premier.

MURELLE (T.)—A Rose of the type of Safrano, only a much stronger grower. It is a very free bloomer and is a Rose with a great future. Color rosy-blush flushed with saffron-yellow.

NATIONAL EMBLEM (H. T.)—Dark crimson, of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

OPHELIA—Salmon-flesh shaded with rose, large, and of perfect shape; of excellent habit; the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous. Certainly a glorious Rose. Be sure to have "Ophelia" fixed in your memory.

PILGRIM—(New.)—In color, a beautiful shade of bright rose-pink. The bud, which opens perfectly, is long and of ideal form. Pilgrim is a Rose of good substance and petalage, and at any stage of development is perfect in color and form of flower. Its pronounced tea fragrance will attract all Rose lovers. It is prolific and highly productive of first quality blooms. The stems are straight and strong. It is the pink Rose to grow. 50 cents.

PREMIER—This is the long-looked for deep Rose for the garden; a beauty, and one you will be pleased with. It is a very free bloomer, almost smothering the plant. The color is bright and attractive. The growth is all that is to be desired, and altogether a wonderful Rose. 50 cents; two-year plants, \$1.00.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red.

MR. P. L. BAUDET (H. T.)—Color carmine-rose flecked with salmon-yellow, center darker. Flowers large and full, vigorous in growth, continuous in bloom. A unique two-tone Rose.

MRS. BRYCE ALLAN (H. T.)—Strong Moss-rose perfume. Color carmine-rose. Flowers globular in form, very erect stems, deep green foliage.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well-known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. CHARLES RUSSELL (H. T.)—This wonderful new American Rose has taken the country by storm. No other forcing Rose except "American Beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand rosy-pink blooms of the largest size and build. 35 cents each.

MRS. CAMPBELL HALL (Tea)—Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral-fawn. Very deliciously fragrant. Awarded gold medal, N. R. S.

MRS. HENRY WINNETT (H. T.)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all the red or crimson varieties. The buds are long and well formed. A superb red Rose. 35 cents each.

MRS. JOHN COOK—White, suffused with delicate pink describes the color of this strong-growing, big-flowered daughter of Ophelia. The color varies with the season, the flush of pink being more pronounced during cool weather, while the Rose is almost white during the long days of bright sunshine. In bud it is nicely formed, the mature flower opening cup-shaped but expanding fully to a large and finely-formed bloom. It is bigger and better in summer than White Killarney and, with its delicate pink in dark weather, is a very charming color. 50c.

MRS. MACKELLAR (H. T.)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

Miss Wilmot (See description on page 4).

THE CREAM OF THE NEW ROSES—Concluded

ROSE MARIE (H. T.)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

TIPPERARY (H. T.)—In color stands between Lady Hillington and Melody, showing an attractive shade of soft golden-yellow in the bud and half

developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

W. C. GAUNT (H. T.)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermillion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

The "Excelsior" List of Ever-Blooming Roses

NEW AND CHOICE FOR OUTDOOR PLANTING OR HOUSE CULTURE

Price, 20 cents each; any six for \$1.00. If you leave the selection of the varieties to us we will send seven for \$1.00. Large two-year-old Roses from this list, 40 cents each, or three for \$1.10.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardly everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

POLYANTHA, OR BABY ROSES

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful, either pot grown or for bedding purposes or for hedge effect. 25 cents each; five for \$1.00; two-year plants, 50 cents each; three for \$1.25.

MADemoiselle CECILE BRUNNER—This is the popular Baby Rose. In the past year or two this Rose has fairly jumped into popularity.

It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds, and combined in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in the winter should be a money-maker, both outdoors and under glass. The bud and flower are both handsome. Color, blush, shaded light salmon-pink; distinct and desirable.
MRS. WM. H. CUTBUSH—Flowers the delicate pink of Dorothy Perkins.
PERLE D'OR—Coppery-orange, changing to fawn.

NEW POLYANTHA, OR BABY ROSES

PRICE, 25 CENTS EACH; TWO-YEAR PLANTS, 60 CENTS.

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY ECHO—The best Polyantha produced. Color rosy-flesh color. Of splendid strong growth and freedom of bloom, which are of wonderful keeping qualities either on or off the plant. This is the improved Baby Tausendschoen. It has more substance and more color, and is the best of all Baby Roses for pot culture. Be sure and try this one.

BABY TAUSENDSCHOEN, or THOUSAND BEAUTIES—Its flowers are large, so much like Thousand Beauties, that it has been rechristened Baby Thousand Beauties. It is a bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, being firm, white, delicately flushed pink, changing to deep rosy-carmine. A splendid Rose. Try it.

EDITH CAVELL—Bright crimson; white eye; very beautiful.

ETOILE LUISANTE, or BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which, on account of the similarity in color, has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GREETING OF AACHEN—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

LE MARNE—Dwarf, perpetual flowering Polyantha. Semi-double flowers, bright salmon-rose at the edges, rosy-blush inside. Blooms abundantly and continuously in bouquets of fifteen to forty flowers. Has fine keeping qualities.

Mlle. FRANCISQUE FAYRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

ORLEANS—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct

showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and is making a sensation in this country. Awarded gold medal.

Baby Doll, or Tip Top.

ROSARIE, or PINK THOUSAND BEAUTIES—This is a bright pink form of that famous Rose, "Thousand Beauties." A grand Rose from any standpoint.

TIP TOP, "Baby Doll"—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll Roses, a bench of "Baby Doll" being an even parterre of delicious color.

BESSIE BROWN—A Rose of transcendent beauty; of the largest size; color pearl-white with a delicate tinge of fawn.

ETOILE DE LYON—Still the best large golden-yellow Rose.

HELEN GOULD—A rich red Rose that is a great bloomer; the shade of red has been described best at a watermelon-red; elegant.

HELEN GOOD (The Beauty Cochet)—What the introducers say: "This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out."

KAISERIN AUGUSTA VICTORIA—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.

LA FRANCE—This is claimed by many to be the queen of all the Roses: bright silvery-pink.

"Famous" Rose Collection for Garden Planting—Concluded

MAMAN COCHET (The Queen of all Garden Roses)

—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.

SOUVENIR DE PRES. CARNOT—Grand Rose of the largest size; color delicate fawn or salmon; fine.

WHITE MAMAN COCHET (No Finer Rose Than This)—This Rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in the immense size of its bud and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

The New Hardy Climbing Roses

HARDY EVERYWHERE

ALIDA LOVETT—Both buds and flowers are large; are of ideal form, are held on stiff stem a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter and more cheerful in color with larger flowers than those of the justly popular Dr. Van Fleet Rose. **35 cents each.**

AMERICAN PILLAR—The flowers are of enormous size, 3 to 4 inches across, of a lovely shade of apple-blossom pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches. They last in perfection a long time, and are followed by brilliant red hips of berries, which are carried late into the winter. **25 cents each; two-year plants, 60 cents.**

BESS LOVETT—Resembles Climbing American Beauty in shape of bloom, but is very much brighter in color and much more fragrant. The flowers are clear, bright red, of good size, and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses. A vigorous grower and free bloomer. The large glossy foliage like that of Silver Moon, greatly enhances the beauty of the flowers. **25 cents each.**

CHRISTINE WRIGHT, OR PINK CLIMBING AMERICAN BEAUTY—This is identical with the Red Climbing American Beauty described next below this variety; flowers four inches in diameter; color bright, clear pink; immense. Try it; a fine companion for Climbing American Beauty. **25 cents each; two-year plants, 60 cents.**

CLIMBING AMERICAN BEAUTY—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection. **25c; 2-year plants, 75c.**

GARDENIA (The Hardy Marechal Niel)—This grand Rose has proven itself hardy in Virginia and Tennessee. It is a deep golden-yellow of the largest size. **25c each; two-year plants, 60c.**

GOLDFINCH—A deep golden-yellow climbing Rose, called by some the Yellow Thousand Beauties; a glorious Rose. **25c each; two-year plants, 60c.**

MISS HELYETT—This is the first climbing Rose to flower, and one of the most easily grown. When established, it sends out long, thick growths quickly covering the space desired. The foliage is not large, but being dense and intensely green, makes an ideal background for the wonderful profusion of flowers. There is such an uninterrupted succession that for almost a month this Rose is the glory of the garden. The bud is short and round and very deep pink veined red and opens to a very full rose with reflexed petals of a blush-pink with a suspicion of yellow mingled

New Rose, Climbing American Beauty.

in, and measures about 3 inches across. In every way, this Rose is worthy of the highest recommendation as it occupies a prominent position in the Rose world. **50 cents each.**

PAUL'S CARMINE PILLAR—The earliest of the Climbing Roses to come into flower. Color a rich rosy-carmine with white eye. **25 cents; two-year plants, 60 cents.**

PAUL'S SCARLET CLIMBER—The flowers of this superb Rose are vivid scarlet, shaded with bright crimson. A gold medal Rose of England. A new shade in Climbing Roses. **35 cents; two-year plants, 75 cents.**

RED DOROTHY PERKINS, or EXCELSA—The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all red Climbing Roses. **25 cents; two-year plants, 60 cents.**

The New Hardy Climbing Roses—Concluded

SHOWER OF GOLD—This variety produces masses of flowers in large clusters. The color is a deep golden-yellow, with orange shadings in the center. Enormous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the "long felt want" for a hardy yellow Climbing Rose. **25 cents; two-year plants, 50 cents.**

SILVER MOON—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. These flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. **25 cents; two-year plants, 60 cents.**

TAUSENDSCHOEN, or THOUSAND BEAUTIES—A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is sweeping the country like a prairie fire. **25 cents; two-year plants, 60 cents.**

It has created a great stir in the Rose world, for the talk of a Blue Rose has been going on since time immemorial. It first opens a pink color, quickly changing to a decided violet-blue. BEAUTIFUL HOUSE FERNS

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Everyone of these Nephrolepis Ferns is entirely distinct in every way. That

we are headquarters for Ferns is evidenced by the choice assortment that we offer. No other firm offers so many distinct and choice varieties. Try us for Ferns.

New Liberty Fern.

The "Fluffy-Ruffles Fern"

Nephrolepis Superbissima

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. **Fine young plants, 75 cents.**

New Fern Liberty

This is our own production. In the past we have sent out Baby's Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantmen and flower lovers, and now we add another one to the galaxy. "Liberty," no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes of it a very striking object. Wonderfully beautiful, different from all other Ferns. First time offered. **Fine young plants, 50c each; strong plants, \$1.00 each. Be sure and try this beautiful Fern.**

The "Parlor Fern"

Nephrolepis Whitmanii Compacta

This is a condensed form of the "Ortrich Plume" Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. **Fine young plants, 35 cents; strong plants, 75 cents.**

BEAUTIFUL HOUSE FERNS—Continued

THE "TEDDY JUNIOR FERN"

Nephrolepis Teddy Junior

"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. **Fine young plants, 35 cents; strong plants, 75 cents.**

"Teddy Junior" Fern.

THE "ROOSEVELT FERN" *NEPHROLEPIS ROOSEVELT*

It is our good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons; it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. **Fine young plants, 35c each; strong plants, 75 cents.**

Fronds of the "Roosevelt Fern."

The "Big Four Fern"

Nephrolepis Splendida

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time.

It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail."

Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns.

It well deserves the name of "Big Four Fern."

Everyone who sees it goes "daffy" about it. This is without question the most splendid of all the *Nephrolepis*. Be sure and try it.

"Big Four Fern."

THE "NEWPORT FERN"

Nephrolepis Scotti

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Fine young plants, 30 cents; strong plants, 75 cents.**

BEAUTIFUL HOUSE FERNS—Continued

The "Ostrich Plume Fern"

Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation." In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. Fine young plants, 35 cents; strong plants, 85 cents.

Ostrich Plume Fern.

John Wannamaker Fern.

THE "WANNAMAKER FERN"

Nephrolepis John Wannamaker.

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzei, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. Fine young plants 30 cents; strong plants, 75 cents.

THE "BOSTON FERN"

*Nephrolepis
Bostoniensis*

In the vicinity of Boston, no other plant is so extensively used as this graceful *Nephrolepis*, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. Fine young plants, 30c; strong plants, 75c.

BEAUTIFUL HOUSE FERNS—Concluded

The "Philadelphia Lace Fern"

*Nephrolepis
Elegantissima*

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. **Fine young plants, 35c; strong plants, 75 cents.**

The "Old Original Sword Fern"

Nephrolepis Exaltata

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the *Nephrolepis* we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. **Fine young plants, 25c; strong plants, 75c.**

Philadelphia Lace Fern.

The "Baby's Breath Fern"

Nephrolepis Goodii.

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well grown specimens in any size. Our reputation for it that no Fern in existence can compare with "Baby's Breath" in fluffiness. **Fine young plants, 50 cents; strong plants, \$1.00.**

The "Crested Fern"

Nephrolepis Scholzei.

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or

LOVELINESS—As its name implies this variety produces flowers of distinction in daintiness and beauty. The color is of pale creamy tone, soft and delicate, with a roseate tinge in the center. Each, 10c; dozen, \$1.00; hundred, \$7.00.

MADAME MONNET SULLY (Lemoine)—Cream-white with red center. Extra fine. Each, \$1.00.

MAINE (Vos)—A variety long looked for by both florists and grower. Its color is pure white; not the faintest spot or blemish can be traced on petals, throat, or the inside of flower. When in full bloom, the petals curl backward, reminding us of the lovely form that characterizes the Easter Lily. There are many flowers open at one time, and these blossoms, correctly placed on the stem, widely expanded, tend to touch each other in the acme of blossoming, giving the impression as though this full row of snow-white cups were one long pyramidal flower. Unlike so many white Gladioli, Maine is an extremely strong grower and rapid multiplier, all first size corms producing two or three robust spikes with deep, green, healthy foliage. In conclusion, we wish to state that Glad. Maine is a crossing between Glad. Europe and Glad. Lily Lehman. Each, \$4.00.

***MAJESTIC**—Here is an orange shade that is new. It is not the orange of Alice Tiplady. This is wonderful, but a shade that has a tinge of salmon in it. Very difficult to describe, but a grand, refined color. Each, \$1.00; dozen, \$10.00.

Color, white, the edges suffused with soft La France pink. The three lower petals have a blotch of sulphur-yellow, stained at the base with fine specks of Tyrian-pink. Strong and vigorous grower and very free flowering. Highest awards wherever shown. The flowers remind one of the rare and beautiful Regal Lily. The growth is tremendously tall and strong, and flowers are of extremely open form. Each, \$1.00; dozen, \$10.00.

MRS. FRANCES KING (Gross)—Could we grow but a few varieties, Mrs. Frances King would be one of them. A most beautiful "Besnard shade" of flame-pink. Flowers of giant size on a spike growing four feet high with from eighteen to twenty flowers. Six to eight open at one time. Beautiful under artificial light. A magnificent variety. Primulinus Hybrids

These hybrids, gained by crossing the species Primulinus with the larger varieties of the Gandavis type, have retained all the daintiness and graceful form of their Primulinus parent, even to the "hood" formed by the drooping of the upper petal, and have an added beauty of exquisite coloring, from the softest primrose to a beautiful rose.

ALICE TIPLADY—Without question the queen of the Primulinus type. The stalk is fully 3½ feet high, lined with twelve enormous flowers. The color is a soft coppery-bronze or pure orange. In color, texture and contour nothing surpasses this variety; either in the garden or cut it is extremely decorative. Each, 35c; dozen, \$3.50.

Dozen, 40c; hundred, \$3.00.

They are the "piece de resistance" for bouquet. Each, 10c; dozen, \$1.00; hundred, \$6.00.

SPLENDID PEONIES

Hardy Everywhere

“ARISTOCRAT OF FLOWERS”

THE wonderful improvements made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, “I have Pink and White Peonies. I desire only Red ones,” but when they are shown the Pink and White, they invariably exclaim, “How grand! I have none like them.” There is as much difference in Peonies as there is in Roses.

It is of a half dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable market variety.

GLORY—This splendid novelty is quite remontant, florets and cluster very large; ground color, Catt-

leya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

LIBERTY—A glorious flower of salmon-red, with large velvety, sharply defined blotches bordered with scarlet. Has all the good qualities of Easter Greeting, its parent, having gigantic trusses. Equally valuable as a pot plant or for bedding out.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is if anything even more free in bloom.

PRINCE—Immensely large flowers, strongly crimped, of fine shade, with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

BEAUTIFUL CANNAS

Cannas are called the poor man's Orchid because one may possess a perfect riot of color in his yard or garden for the minimum of both outlay and labor. They grow rapidly and bloom luxuriantly throughout a long season, requiring merely ordinary hoeing and weeding, and they always respond to plenty of water. Soak the ground thoroughly. Planted in beds of any formal shape, in rows or in front of porches and foundation walls, their rich, tropical foliage and gaudy bloom will repay their care and the insignificant trouble of winter storage.

CARNATIONS THE DIVINE FLOWER PINKS

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground or in pots quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don't buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep in a temperature of forty to fifty degrees at night, and they will yield an immense number of flowers with splendid stems, as fine as those sold by florists. If not pinched in they will bloom profusely during the summer. **We offer the finest varieties in existence.** Your order is incomplete without some Carnations.

Excelsior Collection of Choice Carnations

20 cents each; set of Three Excelsior Carnations, postpaid, for 50 cents, the entire Eight for \$1.25.

BENORA—The ground color is the faintest blush, lightly penciled in soft pink. The bloom is fluffy in appearance, exquisitely beautiful in form. One of the grandest of all Carnations.

CHAMPION—This is by far the darkest Carnation ever seen, and at the same time the most abundant bloomer. Brilliant dark red, shaded with richest maroon, fringed petals, nearly every flower being on a long stem. This variety surpasses in richness of color the most perfect Jacqueminot Roses.

GLORIOSA—This variety has been greatly admired wherever it has been seen for its desirable color, being a beautiful light pink satin color; flowers large size and very freely produced. Plant of grand habit and vigorous growth. It is a superb variety.

GOOD CHEER—One of the most fragrant Carnations we have seen. Color a clear, bright, glowing scarlet; a most continuous bloomer and distinct in color from any other sort offered. Greatly admired by all who have seen it growing here.

HERALD—One of the grandest of all Carnations for the garden, a dazzling red color that nothing surpasses.

MATCHLESS—Largest flowers of the purest immaculate white; large sized blooms. Valuable for garden planting and for pot culture. Very sweetly scented with that delightful old-fashioned clove fragrance.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects.

The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTESS OF LONSDALE—For perfection of bloom, erectness of stem, abundance of flower, this variety has never yet been equaled. On several of the plants we have counted over 150 perfect blooms on one plant. Is there any other garden flower that can equal it? The color is a rich salmon-pink, tinted apricot.

HARDY DECIDUOUS SHRUBS

The Ever-Blooming Butterfly Bush

(*Buddleia Variabilis Magnifica*)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vieing with it in brilliancy of color. This shrub from a young plant, set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. **Fine plants, 35 cents; three for 85 cents.**

Buxus

Ornamental Box—Sempervirens

Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the *Sempervirens Nana*, but we find it so much more vigorous and hardy that we advise planting this and trimming to height required. **20 cents each; six for \$1.00.**

Calycanthus Floridus

(*Carolina Allspice* or *Sweet Scented Shrub*).—A most desirable shrub. The wood is fragrant; flowers of a rare chocolate color, having a peculiar agreeable odor that is very penetrating. They blossom in June and at intervals afterwards. **Fine plants, 20 cents; strong two-year-old plants, 50 cents.**

Cydonia Japonica

(*Japan Quince*). Has bright scarlet flowers in great profusion in early spring. One of the best shrubs. **Fine plants, 50 cents.**

Forsythia Viridissima

A fine hardy shrub, leaves and bark deep green; flowers golden-yellow. Blooms earliest of all shrubs before the foliage comes. **25 cents; two-year size, 50 cents.**

Deutzias

Their fine habit, luxuriant foliage and profusion of bloom render them among the most beautiful of shrubs. They flower in the latter part of June.

HIBISCUS SYRIACUS

Althea or *Rose of Sharon*

Also known as the Hollyhock shrub, belongs to the Mallow family. These are the most beautiful shrubs we have in our collection. The flowers are of large size, very double and full of various brilliant and striking colors. They bloom freely during August and September, when scarcely any other shrub is in bloom. We offer nine of the very choicest varieties as follows:

ANEMONEFLORA—Largest of all *Althea* bloom; double wine-red.

BOULE DE FEU, or Ball of Fire—Double red.

COELESTE—Single sky-blue; extremely showy.

HARDY DECIDUOUS SHRUBS—Continued

Hydrangea Paniculata Grandiflora

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a good, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation. **Young plants, 25 cents. Strong flowering plants, for immediate effect, two years old, 60 cents.**

New Hydrangea "Hills of Snow"

This is the great new hardy shrub that has come to gladden our yards and gardens. We place it first and foremost of all shrubs. It makes a perfectly round, symmetrical bush that is covered from June to August with handsome large pure white flowers. Be sure and plant this new hardy shrub, it will please you greatly. **Young plants, 25 cents each; strong two-year-old plants, 60 cents.**

Plicatum Japanese Snowball

Handsome plicated leaves with globular heads of pure white flowers, early in June; no shrub is prettier. **75c.**

Snowball—Viburnum

(*Viburnum Opulus Sterilis.*) (Guelder Rose.) A well known favorite shrub of large size, with globular clusters of pure white flowers. The Snowball of our mothers' gardens. Blooms in May. **One-year plants, 35c; two-year plants, 60c.**

Hydrangea "Hills of Snow."

MICHAEL BUCHNER—Very large, erect panicles of pale lilac; superb.

PERSICA, PERSIAN LILAC—A delicate purple of rare beauty; very fragrant, rare.

PRESIDENT GREVY—A beautiful blue. Individual flowers very double and very large. The panicle is magnificent; one of the finest Lilacs.

SOUVENIR DE LOUIS SPAETHE—Long panicles of large individual flowers, dark purplish-red; distinct. Superb.

Snowball.

Syringa or Lilac

Well known beautiful shrubs, indispensable in every collection. It is doubtful if anything in the whole range of flowering shrubs surpasses these in grace and elegance, or in hardiness and usefulness. As decorative plants on the lawn or in the border they are without a peer. All of the Lilacs are deliciously fragrant. **One-year plants of Lilacs, 12 to 18 inches high, 40c each; two-year plants, branched, 18 to 24 inches, 75c each; any nine Lilacs, in one-year-old plants, for \$3.00; in two-year-old plants, any nine for \$6.00.**

ALPHONSE LAVALLE—Double dark blue, shading to violet. Extra large panicles, beautiful.

CHARLES X—A strong, rapid growing variety with large, shining leaves, trusses large, rather loose; reddish purple.

DR. STOCKHART—Single wine-red. Fine trusses.

JOSIKAE (Hungarian Lilac)—Fine, distinct species, dark, shining leaves and purple flowers in June after other Lilacs are done flowering. Extra fine.

MADAME CASIMIR PERIER—Very large, creamy-white; superb.

MADAME LEMOINE—A superb double flowering white variety; can't be beat.

MARIE LEGRAYE—Large panicles of single white flowers. The finest white Lilac.

VILLOSA—Color light pink, almost white; one of the latest to bloom; very showy.

VULGARIS (Common Lilac)—Bluish-purple flowers. A standard variety. Always good.

VULGARIS ALBA—Common white Lilac; very large trusses of cream-colored flowers. Extra.

The fourteen Lilacs for \$4.75; in two-year-old plants the fourteen for \$9.50.

HARDY DECIDUOUS SHRUBS—Concluded

Spirea (Meadow Sweet)

These are beautiful shrubs of the easiest culture. Their blooming extends over a period of three months. **One-year, 25 cents each; strong two-year-old plants, 50 cents each.**

ANTHONY WATERER—This beautiful gem makes a low, compact bush and is covered nearly the whole growing season with large umbels of deep crimson flowers which measure nearly a foot across. When scarcely three inches high it begins to bloom, and thereafter is seldom out of flower. As a pot plant or for growing in the open ground, nothing can equal it.

VAN HOUTTEI (Bridal Wreath)—Without doubt the very finest of all shrubs. With us in May and early June the plant is completely covered with a mass of large white flowers presenting a beautiful appearance. Named the "Bridal Wreath" on account of its long graceful sprays of pure white.

Rhus Cotinus (Purple Fringe or Smoke Tree)

A much admired shrub for its curious fringe or hair-like flowers that cover the entire plant, giving it the appearance of being enveloped in smoke. **50c.**

Kerria Japonica (Corchorus)

A slender green-branched shrub with globular, yellow flowers from July to October; fine plants. **25 cents.**

Lonicera Grandiflora

(**Upright or Bush Honeysuckle.**) A beautiful shrub, producing large, bright red flowers striped with white; blooms in June. **25 cents.**

Lonicera Tartarica

(**Tartarian Honeysuckle.**) This Honeysuckle also grows in a bush form, bearing beautiful pink flowers which contrast beautifully when planted with Grandiflora, blooming at the same time. **25 cents.**

Weigelia—Diervilla

They produce in June and July superb large trumpet-shaped flowers that almost hide the plant. They are very desirable for the border or for grouping, and as specimens on the lawn. **One-year plants, 35 cents; strong two-year plants, 60 cents.**

CANDIDA—A vigorous, erect grower; flowers pure white and produced in great profusion in June, and the plants continue to bloom through the summer, even until autumn.

EVA RATHKE—A charming Weigelia flower, brilliant crimson. A beautiful distinct clear shade.

ROSEA—An elegant shrub with fine rose-colored flowers; erect compact growth. Blossoms in June.

Spirea Anthony Waterer.

Syringa or Philadelphus (Mock Orange)

These are invaluable shrubs, blooming in June. **CORONARIUS (Garland Syringa)**—Pure white flowers, highly scented. **20c; two-year plants, 35c.**

GRANDIFLORUS (Large-Flowered Syringa)—Has very showy large white flowers, delicate fragrance. **20 cents; two-year plants, 50 cents.**

MONT BLANC—The branches of this beautiful variety are covered with white flowers that are deliciously fragrant. A grand species. **25 cents.**

BOUQUET BLANC—Dwarf growth with long, slender branches densely covered from base to top with sweet-scented double flowers of creamy-white. In fact, flowers are borne in such great profusion as to totally obscure the plant. Spicy fragrance. **25c.**

NOTE—The last two named Philadelphus are away ahead of the old varieties. Being dwarf, they are superb for hedge planting.

Lilac Madame Casimir Perier.

Hedge Plants

WE HERE NAME THE MOST SUITABLE PLANTS FOR HEDGES

Berberis—Barberry

(*Thunbergii*.) From Japan. A pretty species of dwarf habit. Small foliage changing to a beautiful coppery-red in autumn. A slower grower than the Privets, but needs no trimming and is a feast for the eye when full grown. **One-year plants, 25c each; 2.75 per dozen; \$20.00 per hundred.**

Ligustrum—Privet

Amoor River Privet (*Amurense*.) This is a very graceful plant, requires little trimming. The leaf is small and rounded, plant branching, has not the stiff formal effect that the California Privet has. This is the Amoor River Privet from the north, and is hardy. **Eighteen to twenty-four inches, 20 cents each; \$2.00 per dozen; \$15.00 per hundred.**

California Privet Ovalifolium

This makes, when pruned, a very formal hedge, will grow almost anywhere, thriving where other plants refuse to grow. **Eighteen to twenty-four inches, 20 cents each; \$2.00 per dozen; \$15.00 per hundred.**
